ID Matching

- **GO::Metadata::Panther** - Species specific id matching
 - ≥ 1 species.ncbi_taxa_id (example)
 - ≥ 0 dbxref.xref_dbname
- **seq2pthr2phylotree.pl** - Loading script, where the SQL is
 - Only checks dbxref.xref_dbname if we have multiple results

Not In Database

- 2. Date selected for concurrent annotation
 - Got Excel file from Pascale
 - Should this be in CVS?
- 3. Paint Files (Was: Date Panthr family last annotated (tree annotation))
 - Uses Ajax to get file names and dates from FTP (example)
- 8. 'Date comprehensively annotated' for groups that can provide this information
 - File in CVS?

In Database

- 6. Number of members with EXP
 - Add column to table
- Unmatched Gene Members
- Output data with Spreadsheet::WriteExcel
- Add column with annotation dates & types
- Add Javascript to arrange columns
